

## The Programmatic Approach: Future Proof?

## I. Substantive legal requirements

> No risk, no reward <> In dubio, pro natura?

- > Ex officio alteration of programmes and permits?
- > Abandoning first come, first served?
- $\succ$  Who should pay for reducing emission levels?

Are Current (Inter)National Legal Doctrines up to the Task of Pursuing Sustainable Development With a Programmatic Approach?

Lolke Braaksma L.S.Braaksma@rug.nl

> Legal classification of measures in programmes?

> Complaining against effectuation of measures?

> Do Aarhus Convention and/or National procedural laws support iterative decision-making processes?

Getting rid of the 'Black Box'-related issues?

## the limits of our planet

## II. Participation and Legal Protection
